In the past decade, Dr. Nori's group has published over **31 papers ranked in the top 1% cited papers in all areas of Physics**. This is based on the Web of Science data. Some of these papers are in the top 0.1% and 0.01% most cited papers in physics.

Dr. Nori was ranked third in the world (out of a total of 12,269 authors) in the Thompson Reuters Science-Watch census of authors in terms of contributions to quantum computing over the decade 2001-2010 (sciencewatch.com).

His 5-year-index is 33, over refereed papers from 2010-2014 (50 on Google Scholar). These numbers are extremely high, for a single author, as can be seen by direct comparison with the total 2010-2014 journal article output of the major international physics collaborations: Belle (~400 authors) h=19; Ligo (~800 authors) h=23; and Atlas (~3,000 authors) h=40.
